Take the road with Renault Trucks

Driving with Renault Trucks means choosing a local partner committed to supporting you, whenever you need it.

It means being supported in your energy transition, to meet the challenges of a more sustainable mobility solution.

It means choosing the best technical and financial solutions that a global group has to offer.

It means choosing vehicles that are functional, efficient and comfortable, for an extended use.

It means choosing proven, easy-to-use technology and services adapted to your requirements.

It means forging a strong, welcoming and dependable working relationship.

It means making the right choice.

5 good reasons to choose Renault Trucks

Renault Trucks is the ideal partner for completing your mission successfully. We are relentless in seeking out new solutions to provide you with the best support and to meet your requirements.

Our network of experts, our reliable, robust and comfortable vehicles, combined with adapted and connected services are so many good reasons to choose Renault Trucks!

1

A NETWORK OF PROFESSIONALS
at your side and
at your service

2

SERVICE OFFERS
at your side for your
entire journey

3

A NEW CAB

with equipment that has been redesigned with your comfort in mind

4

TECHNOLOGY AND ENGINES

that are increasingly efficient to save fuel

5

NEW SAFETY EQUIPMENT

to reassure you in your daily activities

An extensive service helping you to optimise your productivity

Renault Trucks vehicles are connected, allowing you to benefit from service offers to ensure maximum uptime of your truck. This makes Renault Trucks the best partner to optimise your vehicle's operating time, optimise its full potential and plan for the unpredictable. Enabling you to manage your activity with total peace of mind.

« Renault Trucks is the best partner for completing my mission successfully ».

Experts at your side, at your service

- Experts, trained technicians
- Extended opening hours, including Saturday mornings*
- Fast appointments for repairs and maintenance

*Depending on Renault Trucks authorised dealers.

Rely on our qualitative parts and assistance

2-Year warranty on our parts and labour

A 2-year warranty on parts breakdown and recovery warranty for all operations carried out by an approved Renault Trucks dealer.

Our Genuine parts

Choose quality genuine parts: reliable, robust and approved to maintain vehicle performance.

Our Reman offer

A range of remanufactured parts that meets the same technical requirements as new parts to guarantee perfect compatibility with your vehicle.

Diagnosis and repair 24/7

With a network of experts ready to answer you in 16 languages, you are backed by a coordinator who will remain your sole contact throughout the entire operation. Breakdown repairs are carried out by technicians trained in roadside operations using specially equipped vehicles and dedicated diagnostic tools.

Drive with complete peace of mind

Make the most of your fleet with our Optifleet solution

REDUCE YOUR ENERGY CONSUMPTION

Optifleet Check

- Monitor your vehicle's performance (fuel consumption, topography, speed)
- Improve your driver's driving style thanks to the Ecoscore personalised report

DRIVE WITH COMPLETE PEACE OF MIND

Optifleet Map

- Allows you to plan your routes

SAVE TIME

Optifleet Drive

- Allows you to download tachograph data remotely, so there is no need for vehicle downtime

VIEW THE STATE OF HEALTH OF YOUR VEHICLES

Optifleet Health

- Monitor your vehicle instrument panel warnings in real time
- Avoid time off the road due to breakdowns

REDUCE ACCIDENTS AND WEAR OF YOUR VEHICLES

Optifleet Safety

- Monitor events linked to vehicle safety
- Improve the safety of your drivers and road users
- Identify risky behaviour

Maximise availability and control your maintenance costs with Start & Drive Predict

MAINTENANCE AND REPAIR COSTS COVERED

Avoid unforeseen costs: a Start & Drive Predict contract controls your costs.

CONNECTED AND CUSTOMISED MAINTENANCE PLAN

We consider uptime as crucial. Our maintenance planning and grouping maintenance operations together are designed to minimise downtime to suit the actual use of your vehicle. Your vehicle's original performance levels are maintained by following Renault Trucks, recommendations.

PREDICTIVE MAINTENANCE

With Start & Drive Predict, benefit from data monitoring in real time in order to:

- Optimise maintenance
- Anticipate breakdowns

REMOTE SERVICES

You can connect to your vehicles even if they are not moving, and update software without needing to stop the vehicle.

Simple and efficient vehicles help control your costs

Building on their many years of haulage experience, designed with proven technologies and the results of quality surveys, the Renault Trucks T and T High are acknowledged to be extremely dependable vehicles. They are perfect for making every trip profitable - and with their outstanding fuel efficiency, they are a real asset for your business.

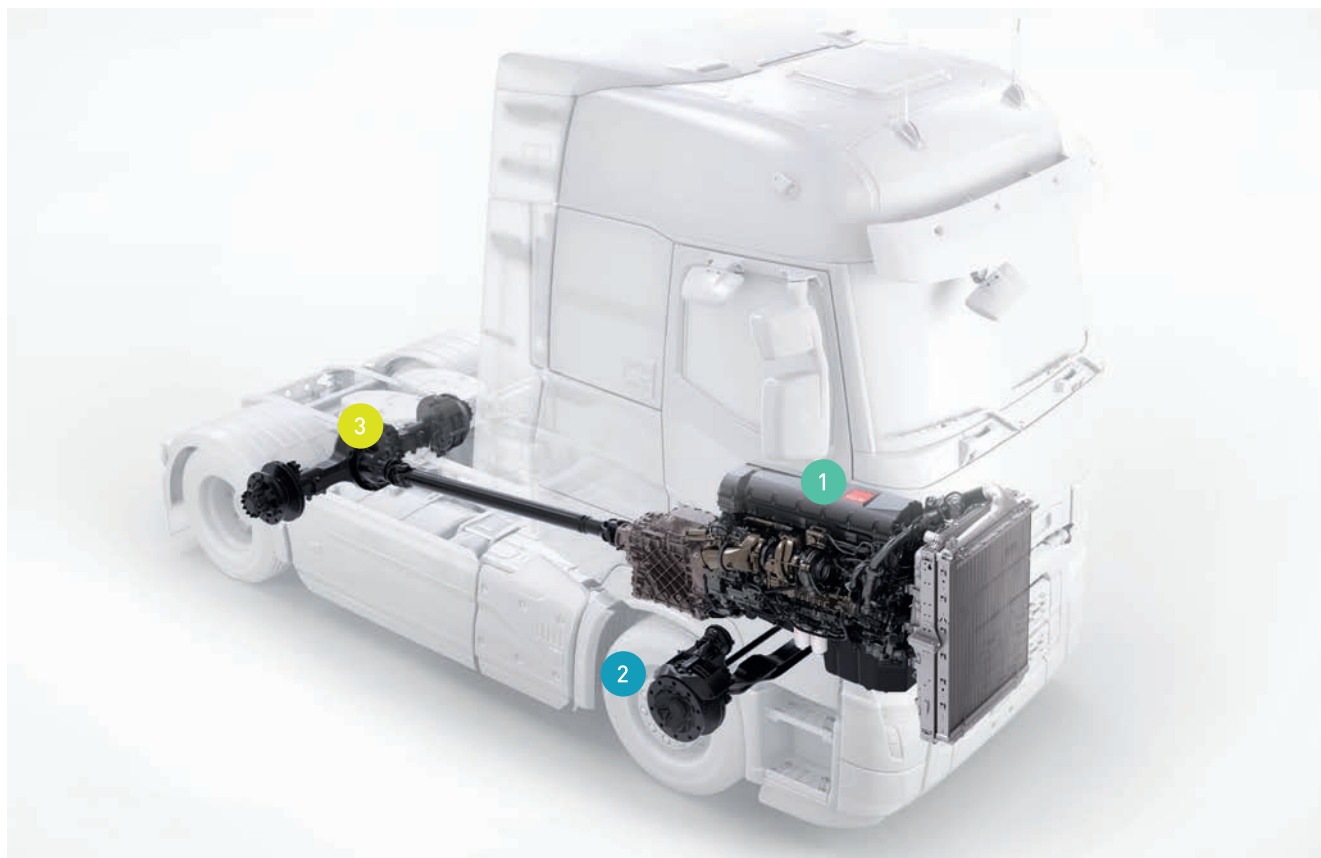

A yellow Renault T truck with a white trailer is driving on a multi-lane highway. The scene is captured at sunset or sunrise, with a warm orange and yellow sky. The truck is in the foreground, moving towards the right. The background shows a blurred landscape with some buildings and trees. The overall mood is dynamic and professional.

« With the Turbo Compound, we have lowered fuel consumption by 3L/100 km compared to our previous trucks ».

A driveline designed for fuel economy

We are relentless in our quest for efficiency and we will provide you with the optimum fuel efficiency for your vehicle use.

Thanks to the Turbo Compound, you can achieve up to a 10% reduction in CO₂ emissions and fuel consumption

Greater reliability and fuel savings :

- 1 DE11, DE13 and DE13 Turbo Compound engines and adapted oil change intervals
- 2 Category A tyres as standard
- 3 Optimised axle ratios

Our engines benefit from:

TURBO COMPOUND TECHNOLOGY

ENGINE COMBUSTION IMPROVED THANKS TO :

- Wave pistons
- New injectors
- Latest-generation filters

REDUCTION OF PARASITIC LOSSES

- Engine friction improvement
- Ball bearing Turbo compressor
- Electrical controlled variable steering pump
- New further efficient brake air compressor
- Even more efficient lubricants

The latest update of the Optidriver gearbox :

- Which allows for 30% quicker and smoother gear shifts
- Dedicated Optivision software

Our engines, combined with the new technology and services, are part of an effort to decarbonise diesel vehicles through the reduction of CO₂ emissions

Technology for controlling your costs

The Renault Trucks T and T High are equipped with technologies making it significantly easier to drive more economically.

OPTIVISION MAP BASED

This option uses topographical data. Data transmission to the on-board computer is automatic and continuous throughout the journey, before starting each new incline ❶, ❷, ❸ and for driving downhill ❹, ❺.

The gear shift, acceleration and speed strategies are optimised, which further reduces fuel consumption.

**Go further in
controlling your
costs with Optifleet**

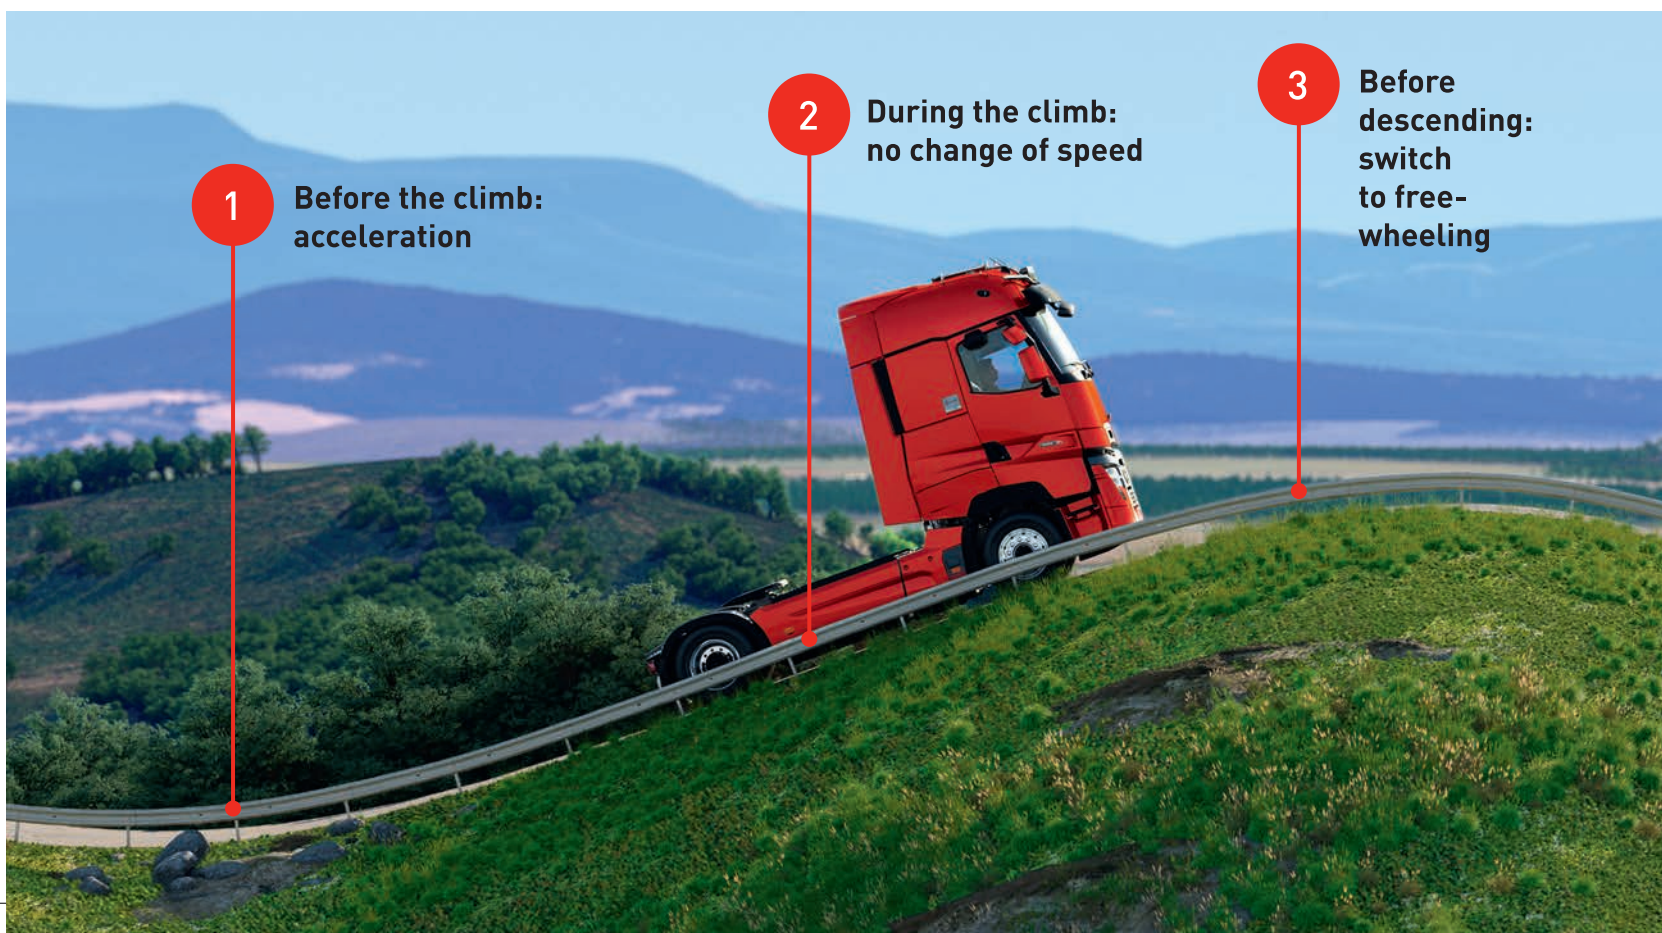

(see page 10)

1 Before the climb:
acceleration

2 During the climb:
no change of speed

3 Before
descending:
switch
to free-
wheeling

CRUISE CONTROL

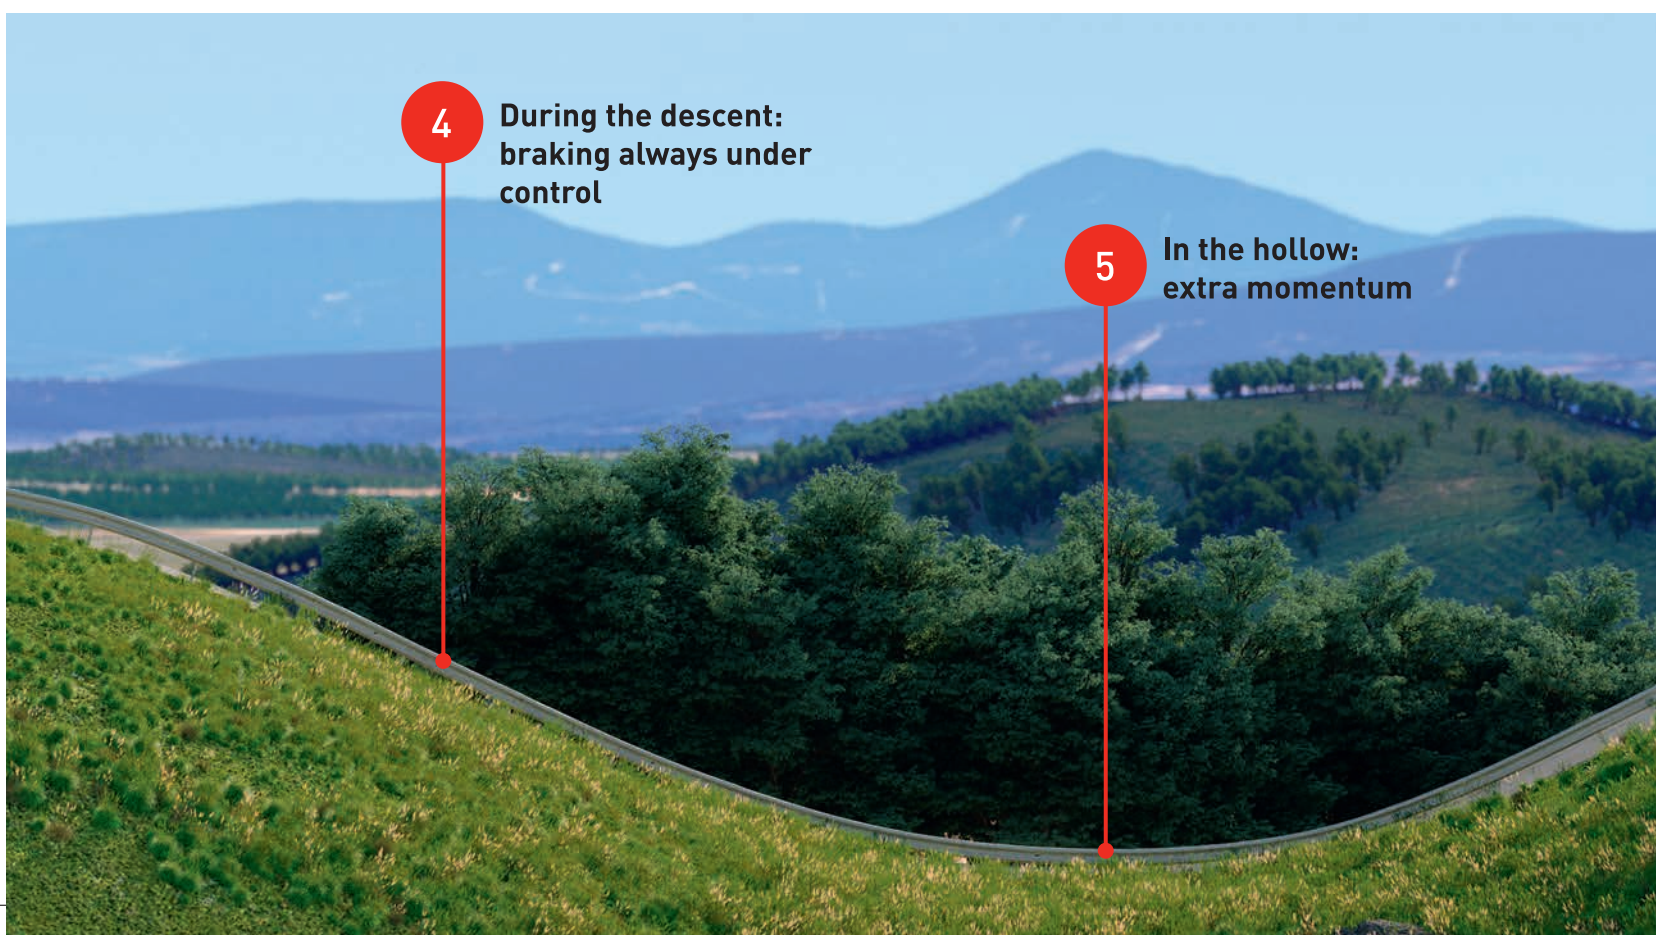

This option includes two driving modes, which can be selected manually by the driver:

Fuel Eco On (default mode)

→ It optimises fuel consumption by intervening with certain driving actions such as acceleration, gear shifting, cruise control or even deceleration.

Fuel Eco Off

→ It can change the way the vehicle is being driven. An indicator provides real-time information about the driving style being adopted.

Aerodynamic design

- 1 Different types of roof deflectors**
Fixed (88 mm), manually adjustable from 285 to 496 mm (fast adjustment optional) - folding lateral deflectors.
- 2 12° Windshield inclination**
- 3 Bumper with integrated spoiler**

- 4 Trapezoid cab**
2.3m at the front and 2.5m at the rear.
- 5 Fairing extensions**
On frame and door extensions.
- 6 Deflector incorporated into the optical block**
- 7 Wheel arches**
Improve air flow and reduce water splashes.

All-in-one financing

Your financial partner, fluent in Trucks.

At Renault Trucks Financial Services, we speak your language and offer many financial solutions (Hire purchase, Financial & Operating leases, Contract Hire), as well as insurance products adapted to your needs. Our complete solutions allows you to fully control your total cost of ownership.

A new, optimised interior promoting driver well being

Within the interior of a Renault Trucks vehicle, the smallest details have been studied to combine convenience and ergonomics. Everything needed to create a genuinely homely atmosphere, at the wheel and during stopovers.

« The steering column allows a great deal more comfort, the driving position is much better ».

Outstanding driving comfort

1 Keyless vehicle starting using the start button

2 Smooth gear shifts thanks to the Optidriver gearbox

3 Smart direction indicator management **NEW**

4 Steering wheel **NEW**
→ Functionality at your fingertips

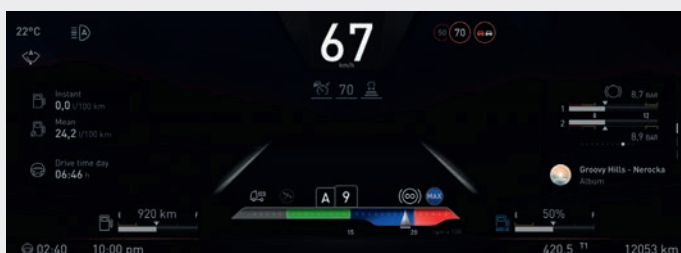

5 Induction charger* **NEW**

6 2 USB-C plugs

7 Storage drawer for A4-format documents

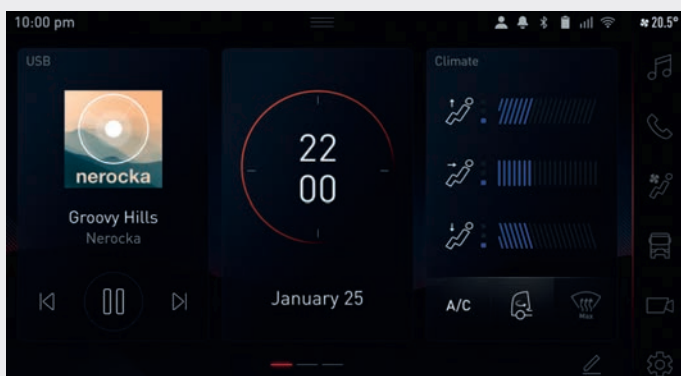

*optional

8 A modernised dashboard **NEW**
→ New dynamic, digital information display

9 A multifunction screen **NEW**

- 9-inch HD touch screen
- Driver aids (cameras, navigation)
- Multiple applications for configuring the vehicle screen
 - Call management
 - Music control

The best steering column on the market

10 Multidirectional column

- 3 adjustable points so you can exactly adapt the driving position to your morphology
- Intuitive foot control on the steering column to determine your ideal driving position
- Easy access to the cab when the steering wheel is in the raised position
- More knee room
- Engine vibrations absorbed for more comfort

A living area just like home

1 «Extensia*» large size lower bunk

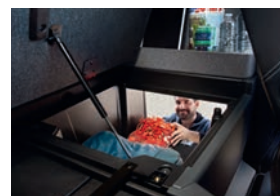

- Length 2,009 mm
- Width 680 mm / possible 120 mm extension (extra sleeping space while preserving living area)
- Mattress thickness: 120 mm; density: 40 kg/m³
- Available with memory foam mattress* with density of 80 kg/m³

2 Cup holder within easy reach

*optional

3 Interior / exterior storage

- Makes loading heavy luggage easier (holding a pack of 6 1.5L water bottles)
- Integral storage pocket to keep belongings in place and near the bunk

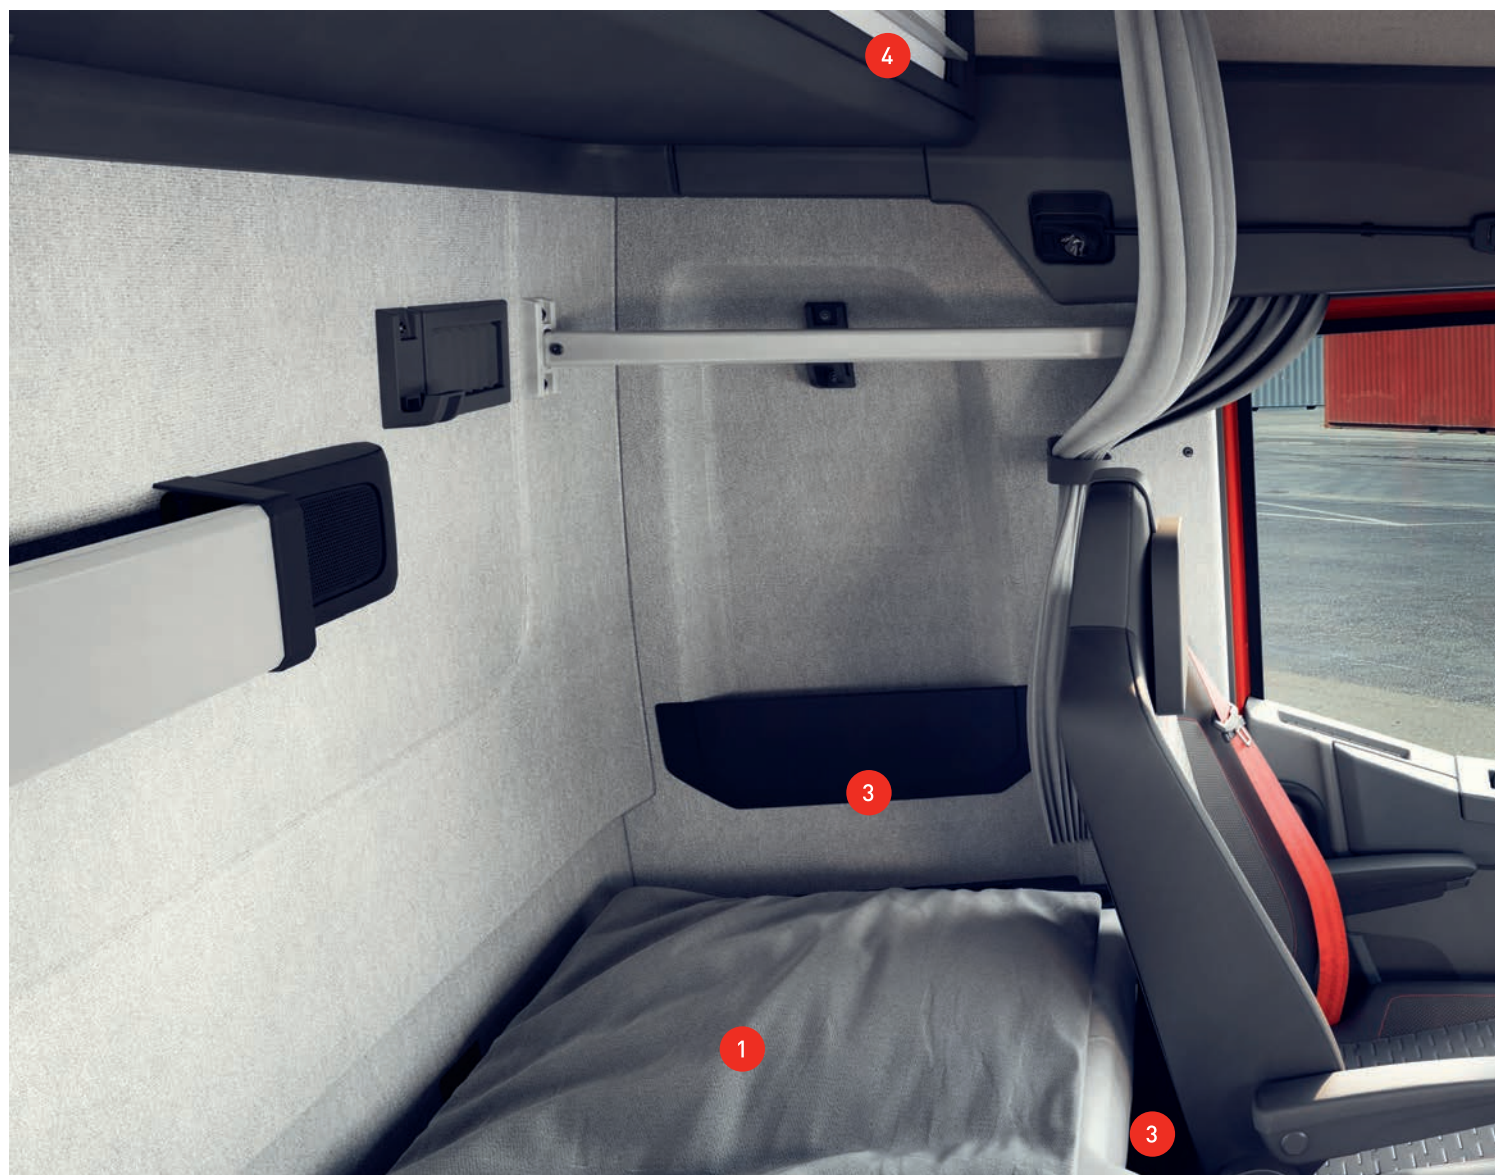

4 221 Litres of storage*

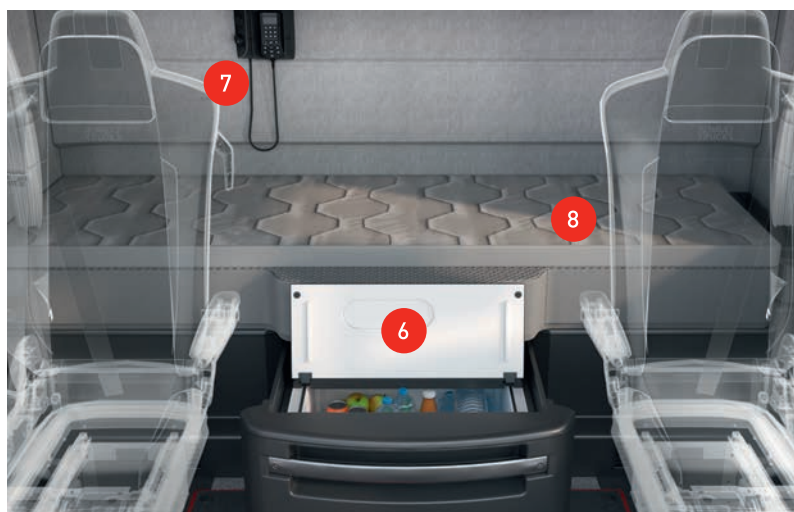

- Lit lockers
- 24 V plug at the back of the cab

*only on Maxispace cab

5 Front storage compartments

within easy reach above the dashboard

6 Silent electric refrigerator*
40 litre capacity or 26 litre on a T

*only on T High

7 Two USB-C plugs
in the bunk

8 Ultra-comfortable «Sérénité» lower bed*

- Length 2018 mm
- Width 671 mm behind the seats, 791 mm in the centre
- Twice the springs and a thicker mattress capable of adapting to all body types
- Mattress can be separated from its base to add a fitted sheet
- New, easily cleaned textured fabric
- Memory foam mattress* (2000 mm x 700 mm x 30 mm), filling 300 g / m³, fabric to match the bunk upholstery

*optional

Features to satisfy your needs

1 Flat floor

→ Makes it easy to walk about inside the T High cab

2 Three compartment storage boxes

above the top shelf

3 Steering wheel NEW and leather-trimmed seats**4 Cup holder**

*optional

5 90° Swivelling passenger seat*

→ Perfect to relax

6 Resilient upholstery with anti-staining**7 FOCAL INSIDE system***
for enjoying an outstanding sound experience**8 Swivel table***

can be easily reached from the passenger seat, the driver seat and the sleeping area

9 Floor carpet

covering the entire floor of the cabin, delivered with fasteners

Technology serving security

The Renault Trucks T and T High feature the latest driver assistance technologies and the most efficient braking systems. This guarantees driver safety, as well as that of pedestrians, cyclists and other vulnerable road users.

Safety equipment to support you

Radars and cameras located all around your truck **NEW**

They warn you and alert you to ease your manoeuvres. You prevent any risks of accident.

Possibility to add 5 digital cameras to monitor the load or the fifth wheel for docking*

Possibility to provide an analog camera for the trailer to monitor the maneuvers*.

*On request for adaptation

Driver fatigue detection and lane departure warning system (LDWS/DDAW*)

Audible and visual warning if a lane departure is detected or if the vehicle is following an unexpected trajectory.

*Lane Departure Warning System / Driver Drowsiness & Alertness Warning

Automatic Emergency Braking System (AEBS)

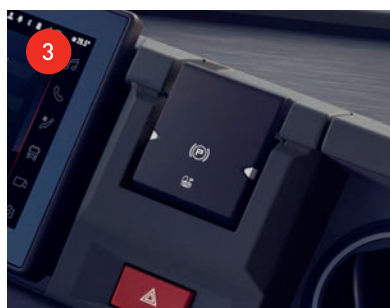

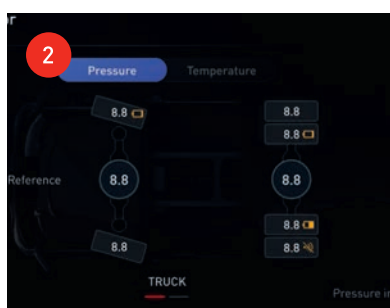

Warns of a possible collision, then brakes and stops the vehicle if any action from the driver.

The hazard warning lights are activated automatically.

Hill start assist

Automatically manages braking when starting to climb, making it easier to set the vehicle in motion and prevent it from rolling back.

1 Automatic activation of headlights and windscreen wipers

→ Improves visibility and allows the driver to concentrate on the road

2 Tire Pressure Monitoring System (TPMS) **NEW**

→ Located on the rims of the truck and of its body, the sensors warn you and alert you on any problems about tire pressure or temperature, which provides you peace of mind

3 Antirunaway mode

→ Emergency parking brake application
→ Stopping the vehicle in case of driver's mishandling

4 Mechanical anti-intrusion locking*

→ For greater safety in the cab when the vehicle is parked

5 Speed Assistance** (ISA***) **NEW**

→ The camera recognises the prescribed speed limit and warns the driver if this is exceeded, to avoid any accidents or penalties

**available depending on geographical location
***Intelligence Speed Assistant

6 Driver Airbag* **NEW**

→ The airbag is deployed in the event of a serious frontal collision

7 Yellow painted cab access steps / handles*

→ Improves safety when getting into and leaving the vehicle

*Optional
